Coronation 1986

Congratulations, Ken & Sissy For an Outstanding Reign!

WELCOME TO SAN FRANCISCO AND CORONATION 1986

We have been on a long voyage that is nearing an end and we have learned more than we thought possible. We have taken a bit of San Francisco to places and people who had begun to forget that the Emperor and Empress of San Francisco still believed in the traditions that were started in our city twenty years ago.

We would like to give Special Thanks to our Cabinet and Court for a year well done. We cannot name all the people who have helped us during our reign but we want you all to know that we realize how important you are to the Court System and, indeed, to the Gay Community of San Francisco. The song "Wind Beneath My Wings" gives an accurate picture of the vital part you play in our fantasy of being Emperor and Empress:

"I can fly higher that an eagle but you are the wind beneath my wings"

Each of you has his own interpretation of what the Emperor and Empress should be. We, too, had our ideas of what should be done and, after a year, we feel that our efforts have been successful. There is no doubt in our minds that the new Emperor and Empress will be able to extend the offices to more areas of the community and we must all support their efforts whether or not they were our candidates. We must continue to keep the Courts involved in the service to our brothers and sisters. We must help to preserve the memories of those who are no longer here and help to ease the pain of the living.

Let us promise ourselves that each day will be better than yesterday and that we will always believe in tomorrow. For us, we have memories and friendships that may not have been possible had we not held the Titles. To the new Monarchs, we pledge our support to allow you to reign in your own way, on your terms and with your goals.

To Councils of Emperor and Empress and the City of San Francisco:

"Because of you Stories like ours Have happy endings"

With our love and appreciation,

Emperor Ken Wright

Empress Sissy Spaceout

NOMINATED FOR ENTERTAINER
OF THE YEAR 1985

Congratulations to Ken and Sissy WELL DONE!

CONDONS FOR ORAL SEX?

Why not?

Condoms are an effective barrier.

Researchers at UCSF recently proved in laboratory tests that commercially available condoms can stop the AIDS virus. The virus cannot penetrate the condom material of either latex or natural skin condoms.

Condoms are absolutely essential for anal sex.

Anal sex without a condom is, of course, incredibly foolish at this point in the AIDS epidemic. Statistical analysis of those who have become infected with the AIDS virus shows that unprotected anal sex is the chief cause of AIDS transmission among gay and bisexual men in America.

Condoms are also effective for oral sex.

Thanks to modern technology, condoms are now extremely thin (a fraction of the thickness of a human foreskin!) and can be very sensuous. With oral sex, condom breakage is extremely rare. Some brands of condoms have a neutral or pleasant taste. (Some are awful, however, so try different brands!)

Semen can carry large quantities of the virus.

Semen is a body fluid that

UNSAFE SEX PRACTICES

Anal Intercourse
Without Condom
Rimming
Fisting
Blood Contact

Sharing Sex Toys or Needles Semen or Urine in Mouth

> Vaginal Intercourse Without Condom

is known to be capable of transmitting large quantities of the AIDS virus. Oral sex to climax —getting semen in your mouth or in the mouth of your partner—is obviously Unsafe.

Preseminal fluid ("precum") may also carry the virus. With preseminal fluid, safety could also depend on the quantity of fluid you are exposed to. Some men produce a lot of preseminal fluid, some don't. Why take a chance? Unprotected oral sex—stopping before climax—is only "possibly safe." By adding a condom, you are adding significant protection.

Condoms eliminate the worry.

For oral sex, a condom reduces both the risk and the worry. Condoms allow you to experiment, have sex longer, and safely enjoy the encounter with your partner. Sex without worry is obviously far more enjoyable for both partners.

You can easily learn to use condoms for oral sex.

Be creative; try different brands. Lubricated condoms are best for anal intercourse, but many people prefer unlubricated condoms for oral sex. If you add a lubricant, make sure it's water-based. Condoms are inexpensive and readily available. Experiment!

Unsafe Sex is now definitely obsolete.

Male-to-male sexual survival in the '80s calls for adaptability and creativity. Gay and bisexual men are certainly capable of both. Let's completely end Unsafe Sex until this epidemic is over. Most of us already have—let's make it unanimous in '86.
